

Dear sirs: I ahve not been a member of XM Radio for long, but the reason that I got the system was to have an uninterrupted source of back ground music while I am working and doing other things that require my concentration. However, more recently I have installed my XM receiver on my vehicles. I find that it is a good way to find information while I am travelling, when I want it. I se no threat to the broadcasters that would warrant any action against the XM system. I pay for this privelege and wish for it to cntinue intact and as is.

Sincerely, Richard S. Wilson
